

This is a General Guide For All My Re-brand Software. They All Work the Same.

Open the Folder named "brander"

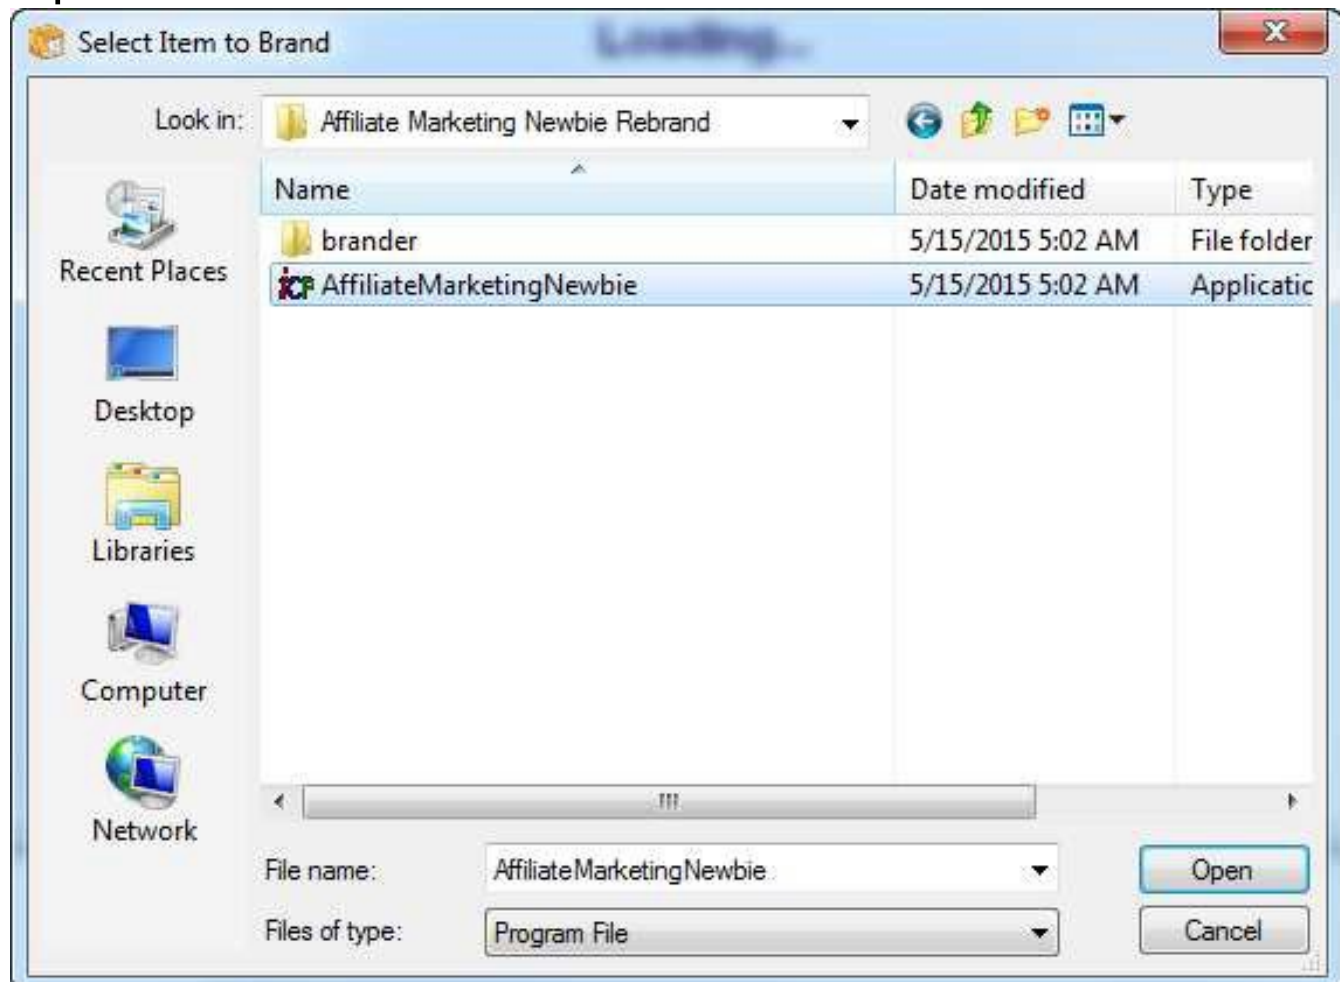

Double click on the application file named "brander.exe"

This will Open the Window "Select Item to Brand".

If You Don't See The File Click The One Up Button

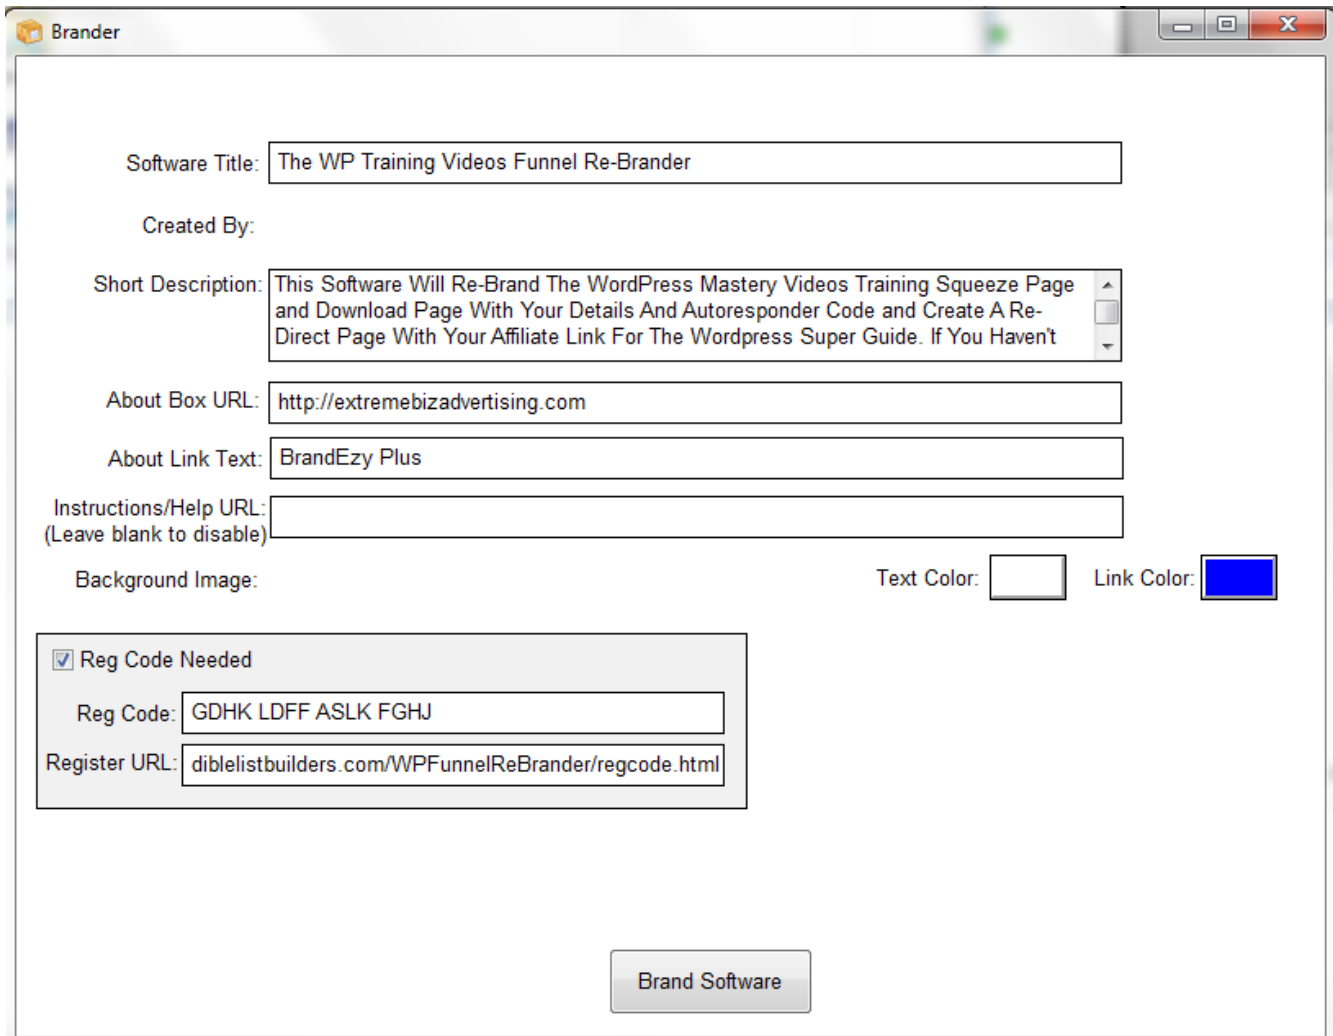

Next You will see the Software Application File to Rebrand. Click on the Software App File and Click Open.

You will now be in the Branding Tool. It will state in the Software Title For the application you are rebranding.

Fill in your details. You Can Re-brand the “About Box URL and About Link Text The Instruction Help URL and You can Re-brand The Registration Code. Software Title and Short Discription Should Remain The Same. Click Brand Software

The screenshot shows the 'Brander' application window. It contains several input fields and a 'Brand Software' button. The fields are as follows:

- Software Title:** The WP Training Videos Funnel Re-Brander
- Created By:** (empty field)
- Short Description:** This Software Will Re-Brand The WordPress Mastery Videos Training Squeeze Page and Download Page With Your Details And Autoresponder Code and Create A Re-Direct Page With Your Affiliate Link For The Wordpress Super Guide. If You Haven't
- About Box URL:** http://extremebizadvertising.com
- About Link Text:** BrandEzy Plus
- Instructions/Help URL:** (empty field, with a note: (Leave blank to disable))
- Background Image:** (empty field)
- Text Color:** (empty color picker)
- Link Color:** (blue color picker)
- Reg Code Needed:** ☒ (checked)
- Reg Code:** GDHK LDFF ASLK FGHJ
- Register URL:** diblelistbuilders.com/WPFunnelReBrander/regcode.html

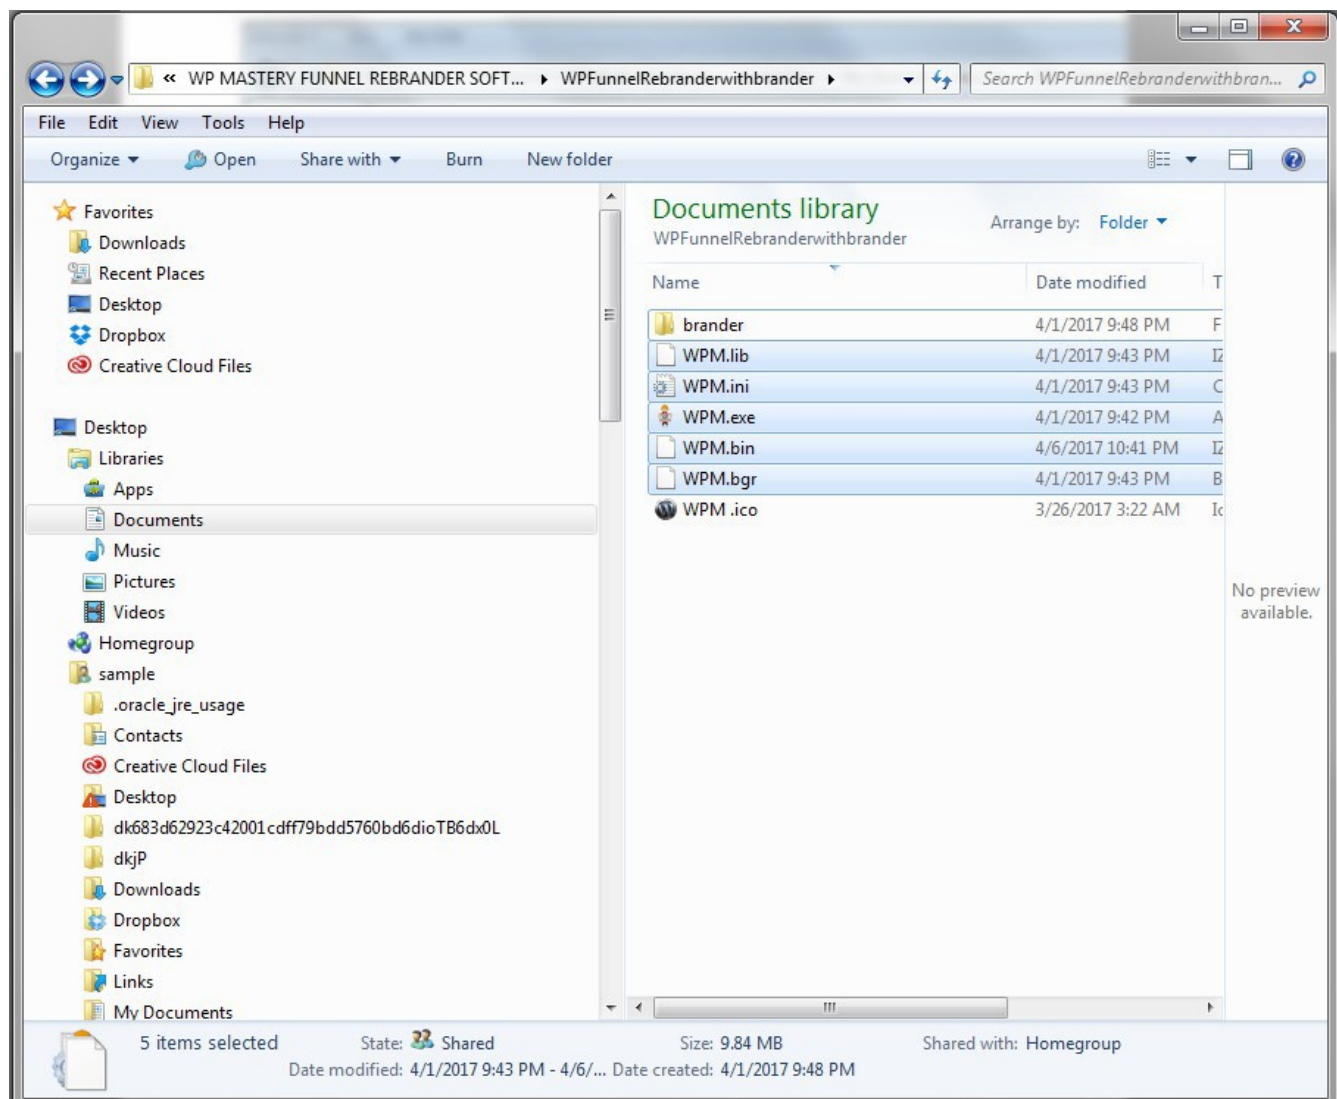

A 'Brand Software' button is located at the bottom center of the window.

Now go back to the Window and navigate back to the Product Name Rebrand Folder .

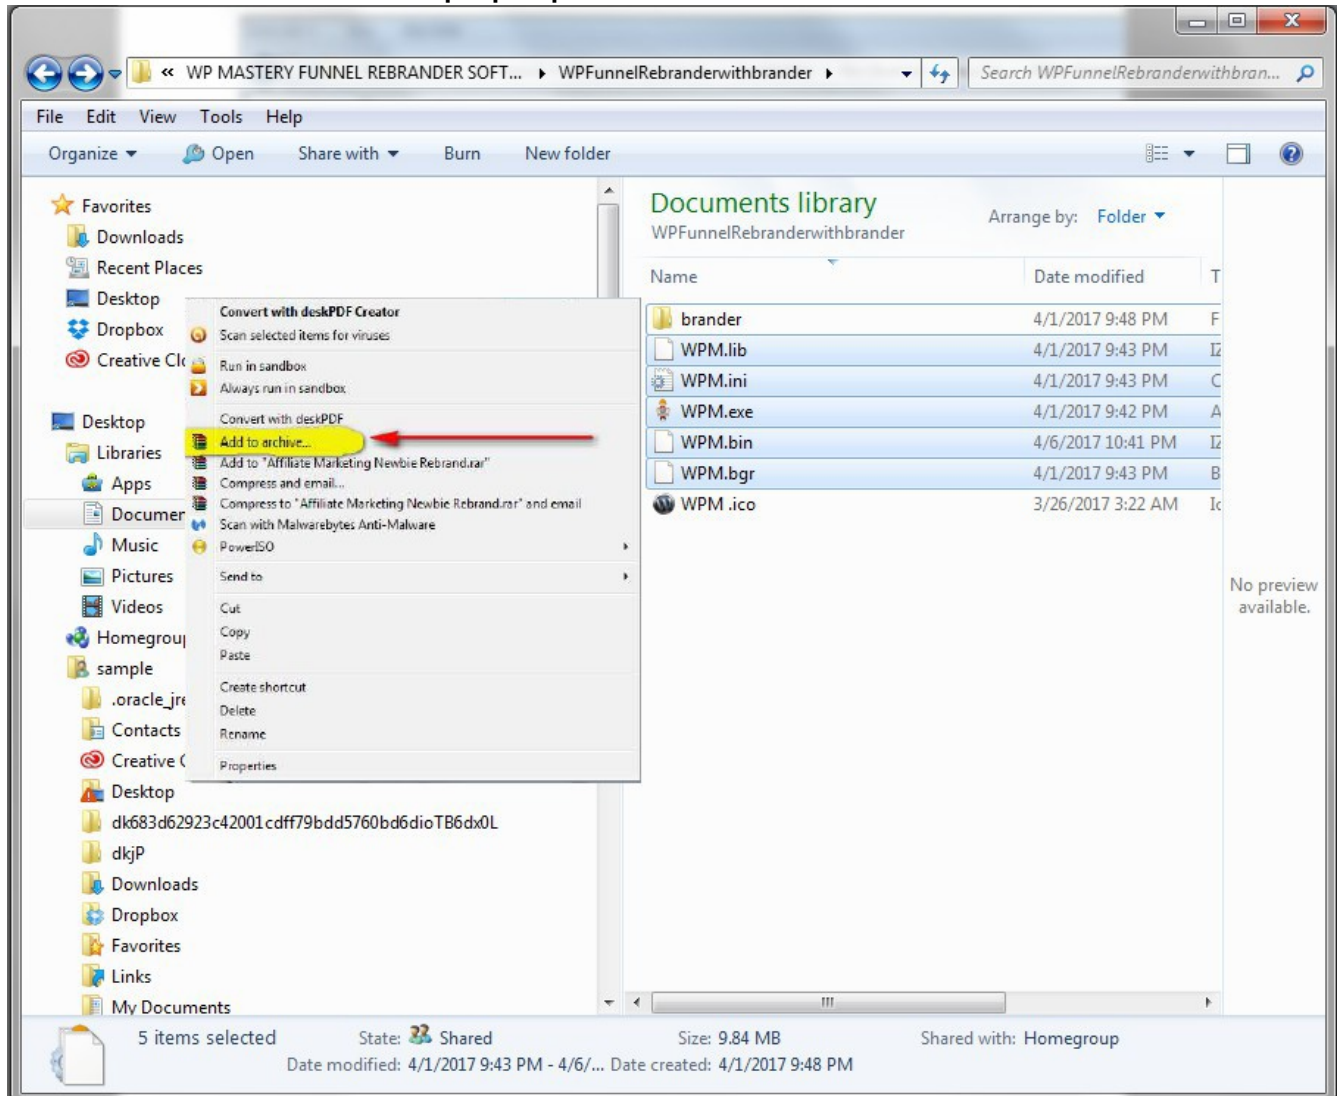

We will now compile the software into a .exe executable file.

You Will Need To Download and install [The Free Software WinRar](#). It Will be used to create the .exe file

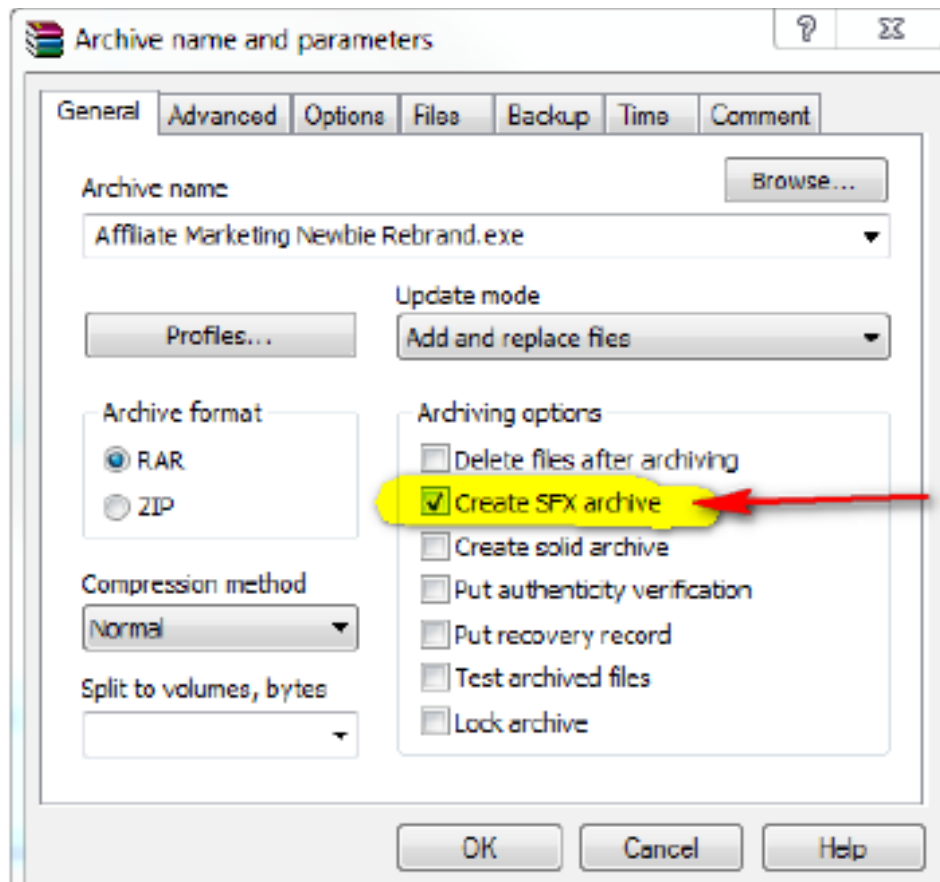

Hold down the Ctrl Key and select all the files except the .ico and do not select the brander

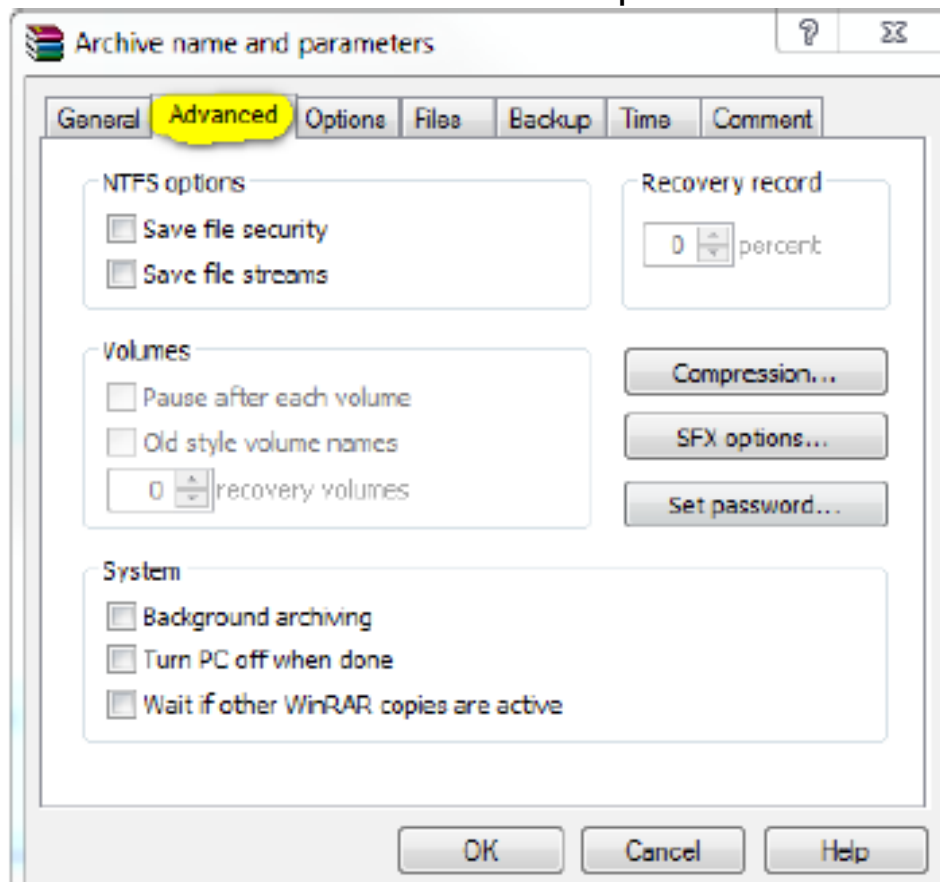

Right Click on the Product Name Application File, in this example it is WPM.exe This will pop up a box, select Add to Archive.

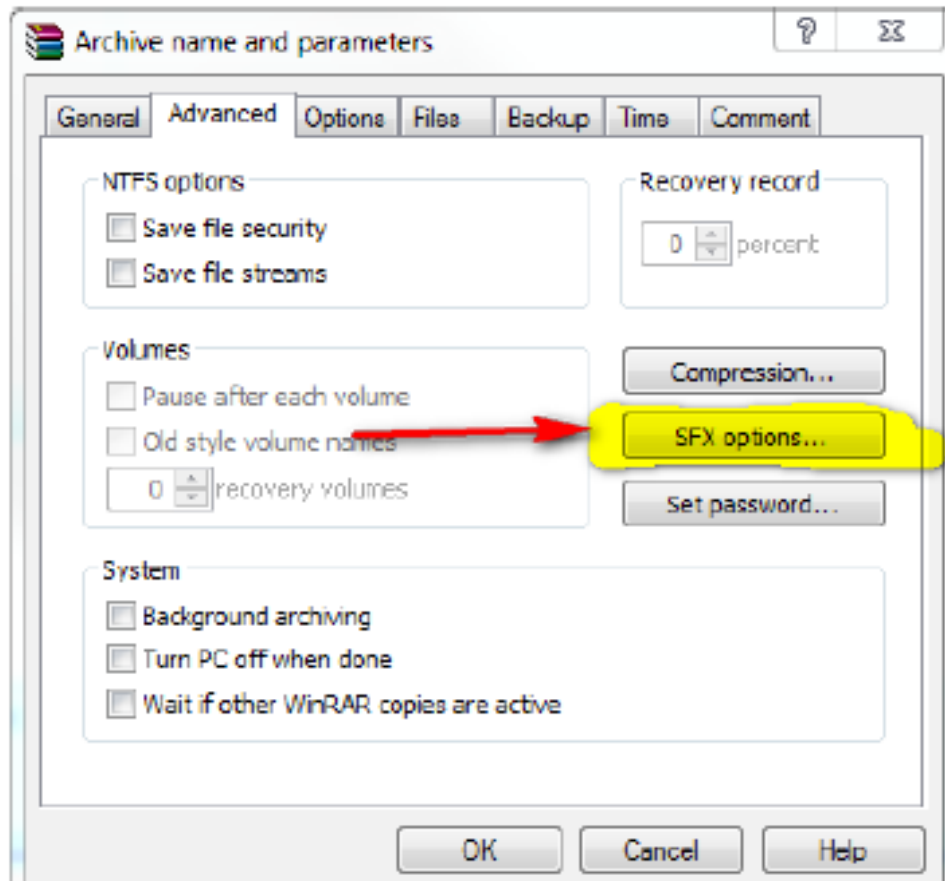

This will open the Archive name and parameters Window.
Then, Check “Create SFX archive”.

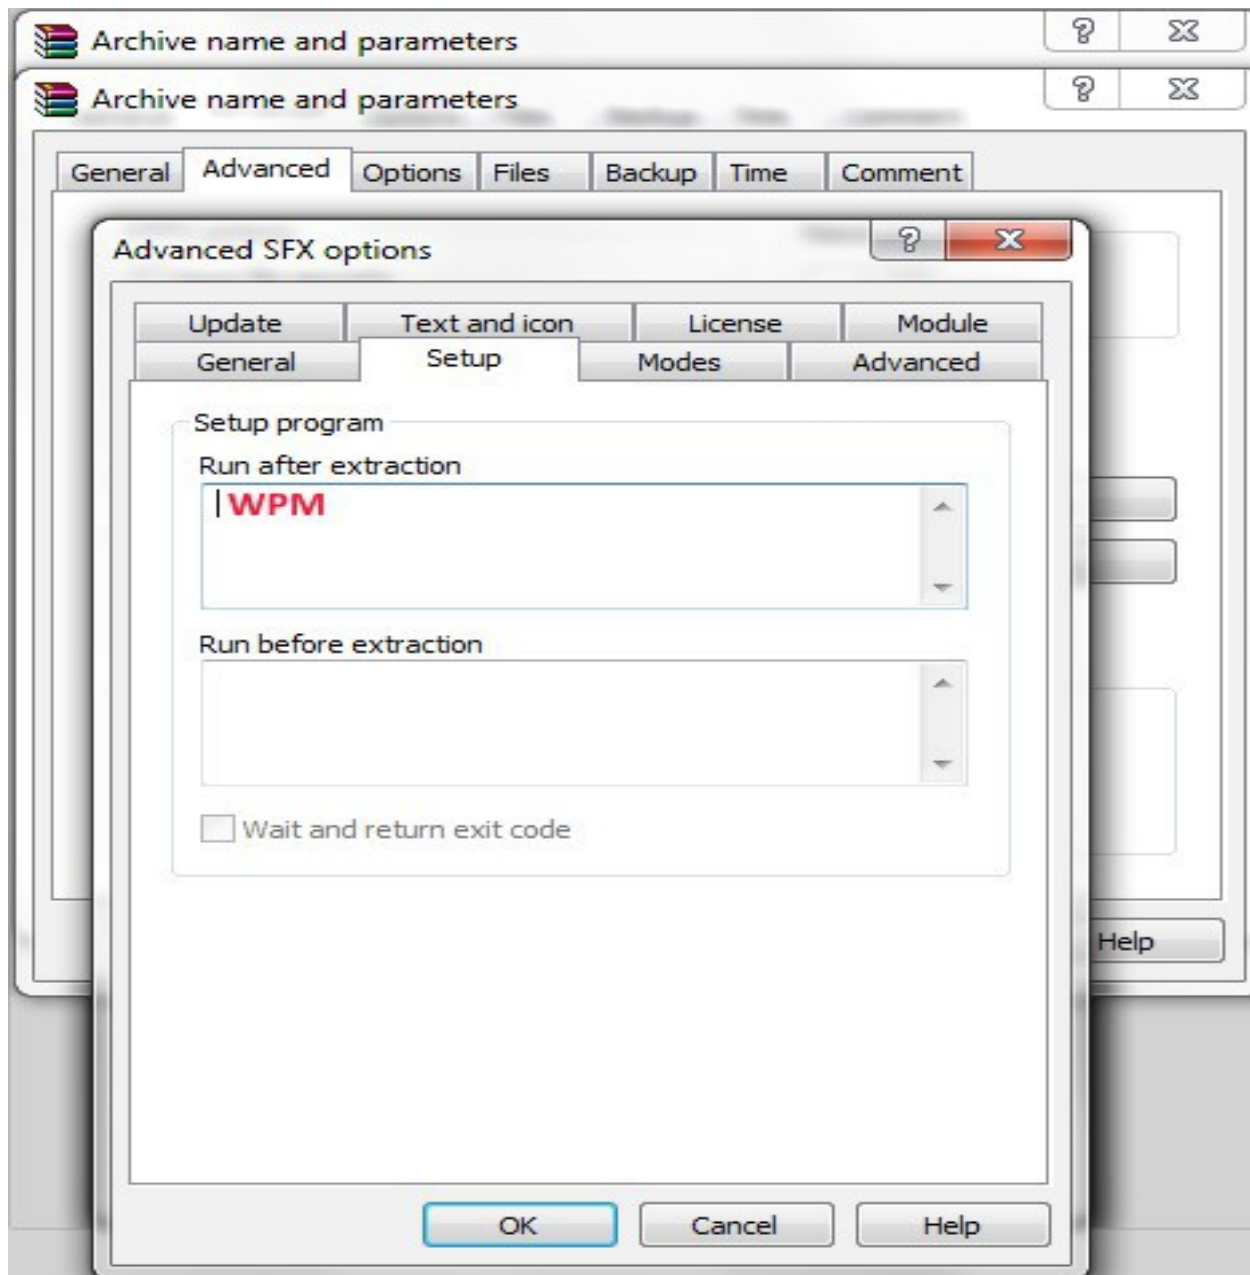

Next, Click on the Advanced Tab at the Top of the Window.

Click on the SFX Options Button. This will open the Advanced SFX Options Window.

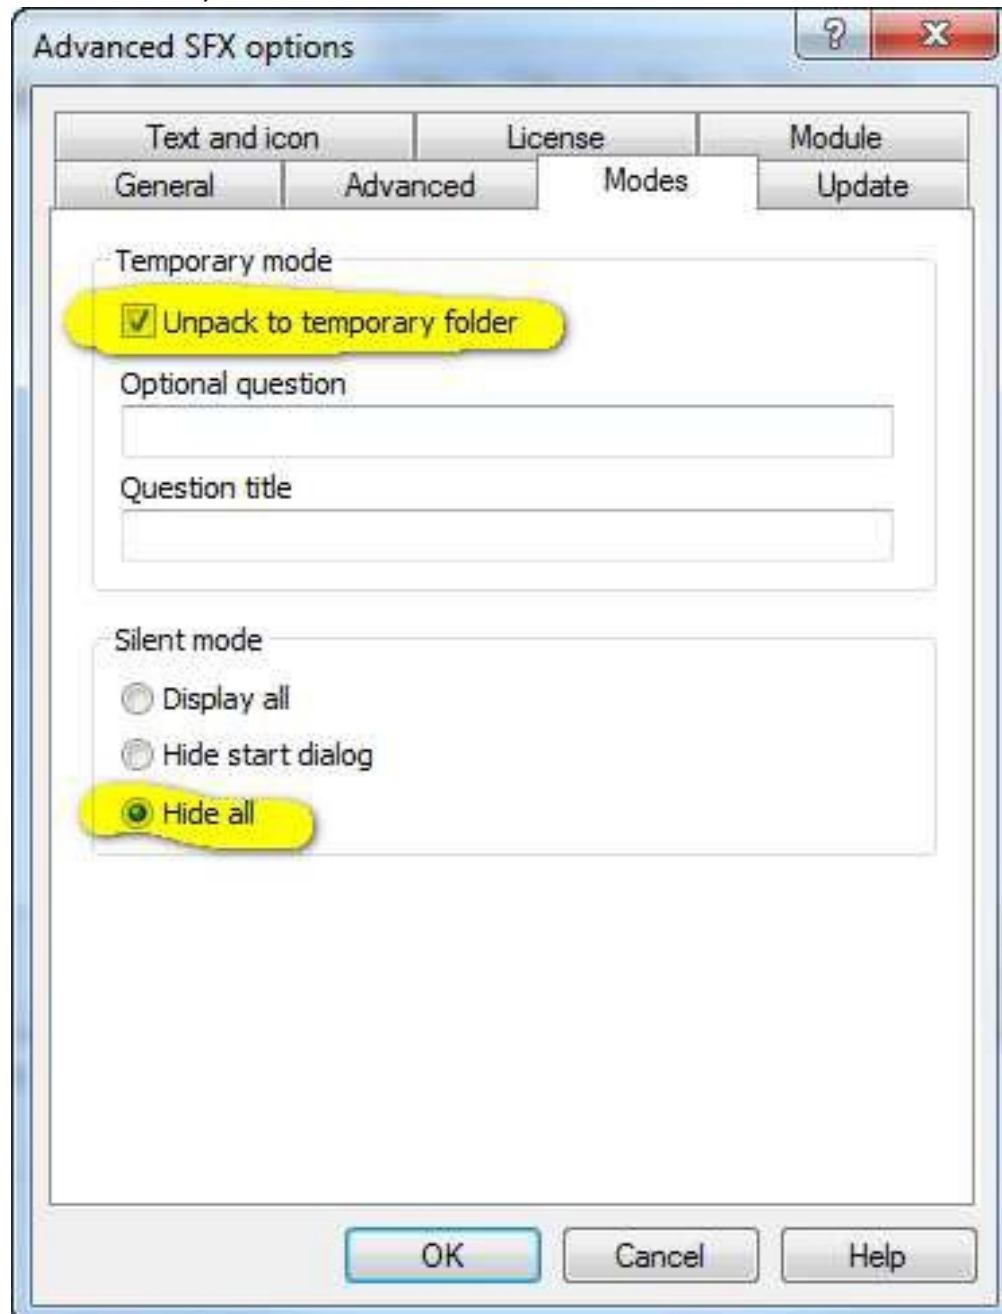

The Advanced Screen Will Open and Now Click SETUP

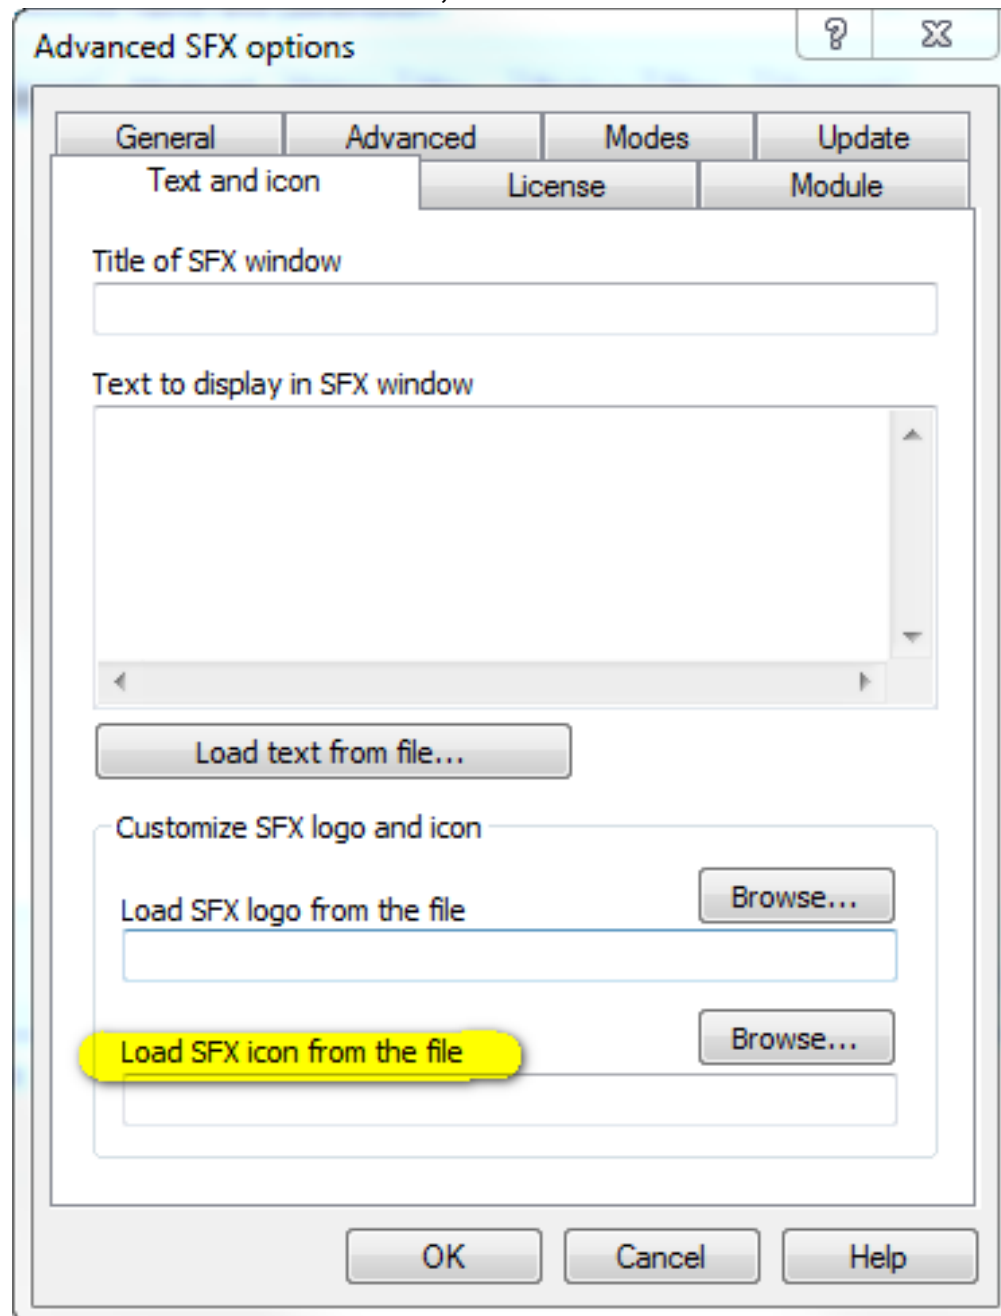

Setup Program, Run After Extraction box, enter in the Program Name EXACTLY as shown in the folder. In this example, the software name is WPM Enter it EXACTLY as shown in the folder no spaces, enter the name exactly or it will not work

Next, within this Advanced SFX Options window, click on the Modes Tab. Click on Unpack to temporary folder.

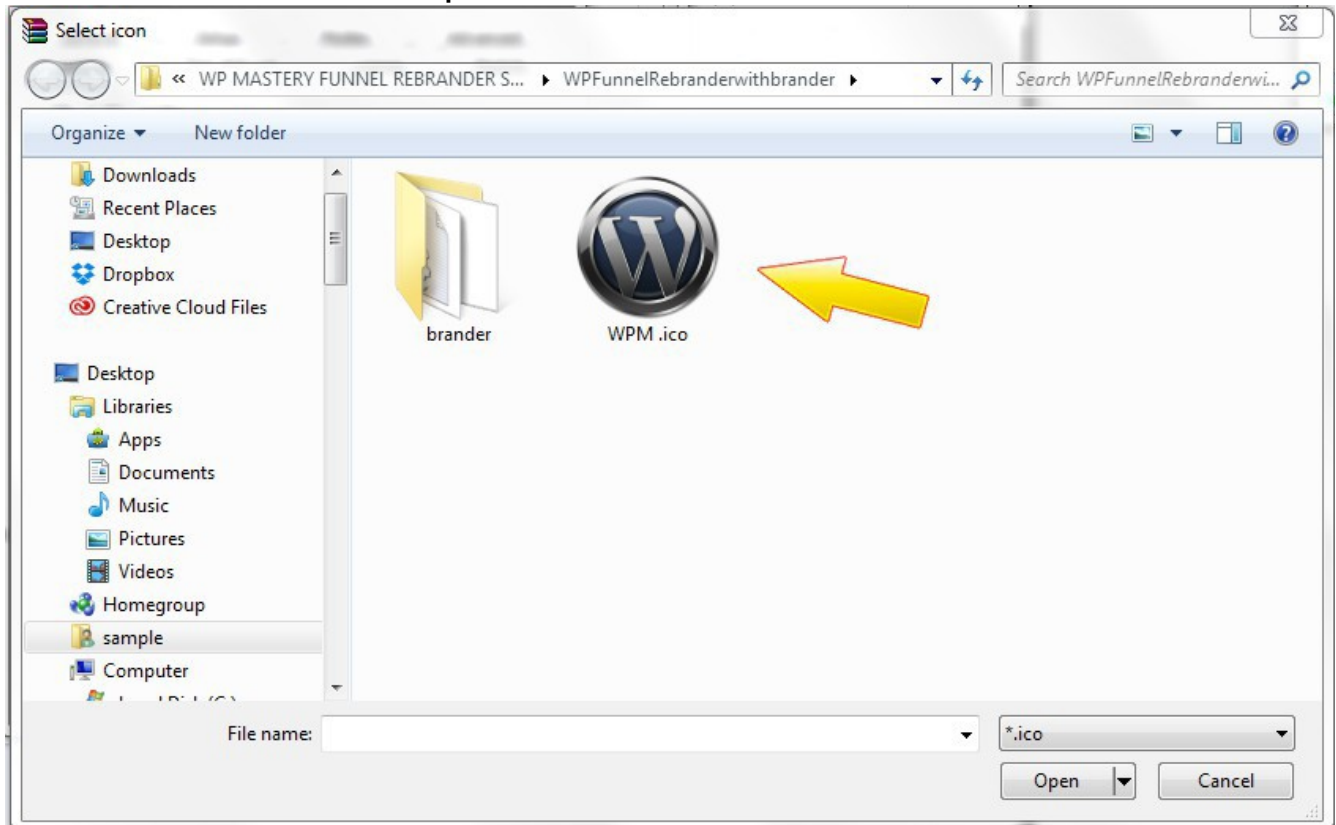

Under Silent Mode, Click on Hide All.

Then, Click on Text and icon Tab. At the bottom of the window where it says Load SFX icon from File, Click on the Browse button

The icon for the software will show in the Select Icon window. Select the icon file and click Open button.

The icon file will be named exactly the same name as the software application file.

Click Ok and OK

A Window will pop up Creating a Executable Archive

You now have your own software rebranded with your information to sell or giveaway in a single software file application.

You will know which file is your rebranded version because it will have the same name as the folder it's contained in.

I suggest moving this file to another folder and renaming The Single Software .exe File.

Example: Mobile-Website-Buddy.exe

Thank You

Garry Desmarais
